

Dear Pastor,

Our state flaunts evil!

Gone are the days when pastors were silent! We are reaping the consequences of silence! Radical proponents of evil have fewer numbers, but they are louder! And they are in power!

If abortion clinics close and castration of children stops, it will be because pastors speak up!

Do you want Colorado back? Or do you like a communist state that wants to kill and castrate children and persecute Christians?

It's up to you! You are the leader in your community! For good, or by your silence, for evil!

No parachurch organization can do what God has called His own people to do! We are the hands and feet of Christ! The gates of hell cannot prevail! Gates don't move!

We are to be salt and light in all our lives - government, media, education, ...! We have left a void where demons now occupy!

Did you know that it is illegal in the state of Colorado to teach in schools that abstaining from sex is the best or only way to prevent pregnancy? And that those profiting from abortions are the ones teaching sex in public classrooms?

Did you know even in my conservative rural county it is illegal to speak to elementary students about the Bible or to hand them a Bible, but it is alright to talk about transgenderism?

Do you know that it is legal to poison, stab, scald, and dismember children all the way through birth?

Where can the church step in to save these children? Everywhere!

We Cannot Do this Without You!

If we will have transparent and fair elections to elect people who represent us (not computer generated), or if we will change our Constitution to include "the least of these", it will be because pastors speak up!

Who is teaching the children? Are children getting a Christian education or being taught the religion of secularism with an absence of God? Are they being taught that God gives human liberty or that we take whatever government will give us? Are pastors the shepherd of the flock or has health become an idol with doctors the priests?

Do you know we have a shortage of babies to adopt in the US? There are currently 2 million couples wanting to adopt and they would like to adopt several babies. There are 36 couples vetted and able to pay tens of thousands of dollars for every one baby available. There are approximately the same number of adoptive families available as abortions every year. And these children do not need to go through the foster care system but straight from the mother to the parents SHE chooses to parent her child. Did you know that abortion clinics exist only to kill children and do not help mothers and do not abide by any of the safety and health standards of legitimate medical clinics?

Jesus had a lot to say about evil and how to respond to it. No, he didn't overrun the Roman empire. That wasn't His mission. But God created government. The Romans and religious leaders were in charge in Jesus' day; did you know YOU are in charge in ours?

So, what will you say?

Do you love your neighbor like you love yourself? Do you love the kids down the street as much as your own? Do you love your preborn neighbor as much as you love your own life? They don't get another life! The Bible doesn't teach reincarnation! How many preachers, teachers, statesmen, missionaries, plumbers, roofers, nurses, inventors, and disease cures are we missing because we have aborted an entire generation? And the generation after them will never be? What kind of rebellion against the Creator of our souls will do such a thing? Can we stop it?

Every time I ask God how, He gives me the same answer.

It is the pastors.

It's not the educators or the politicians or a parachurch organization. It's the pastors.

So here's the challenge, Pastor, if you're willing to accept it.

First, will you teach the whole counsel of God? Including the part about sexual immorality and "thou shalt not murder"? (And yes, that includes the little babies jumping in the womb who already have little personalities, faces, fingers, and toes.)

Evil is rampant in our state because "my people perish for lack of knowledge/vision". We are not talking about blobs of tissue or a woman's period, we are talking about people made in the image of God – sons and daughters. Abortion harms women, kills children, silences men, and tells the church you are irrelevant to do anything about it! But what does God say?

What does God say about child sacrifice? About idolatry? Every abortion is an act of idolatry - school, career, money, relationship, reputation, convenience, ... something or

someone is more important than obeying God. It is giving one's body over to the demonic instead of God. These children's blood cry from the ground for justice. We have polluted the land with the blood of innocents. Ten times the number of children are being killed every day than in Nazi Germany.

So, what does your congregation know about it?

What is your congregation doing about it?

Are you ready to take the land? Will you do YOUR part?

Here it is.

First, women and men need to hear the gospel – that Jesus' blood is more powerful than the blood on their own hands. And the blood on ours for allowing it to happen.

If we are going to overturn the current evil law of abortion through birth in Colorado, if we are going to end the castration and mutilation of children after they born, this has to happen.

First, we end computer generated elections for same-day, in-person voting with voter ID. Make it a holiday so everyone can vote!

Second, elect people from your community who don't just say they are prolife, but who actually put forward laws and vote to end child sacrifice in the state. They commit to do it and you hold them accountable to do it.

Third, the only way now so legislators can do that is to change the Colorado Constitution with a people's ballot amendment. It takes 2% signatures of registered voters in every Senate District and 55% of the vote to pass.

It's going to take people serious to get this done. It may take sacrifice of a vacation to save the lives of these children. It may lessen the amount of time watching television or playing video games, getting that coffee or donut, or time at the spa or reading that book.

And here's the only way God keeps showing that this can be done.

We need a church in every Senate District to lead the charge by doing the following:

- 1) The pastor speaks openly about ending abortion and transgenderism child mutilation
- 2) The staff provides a way for people to sign out and return the Official Legal Paper Petitions and staff or volunteers verify the addresses to match the Senate District.

- 3) The church enlists all the churches in the community to participate.
- 4) The churches organize teams to collect signatures from all churchgoers and in the community – at events, in front of Wal Marts and grocery stores, door-to-door, at group meetings, gun shows, political meetings, Bible studies, and in the church foyer.
- 5) Each team fills and turns in the petition packets every weekend and goes back for more. Each Senate District needs between 2,000 and 3,000 signatures. Each Official Legal Petition Packet has room for 40 signatures each. Signatures may be gathered by volunteers or by raising funds to pay professional circulators at \$15.50 per signature.
- 6) The churches need to be willing to print flyers, attend community events, run ads in newspapers, radio, and television, pay for yard signs, put up a billboard, talk to neighbors, make announcements in church, and do whatever it takes to get the word out that we need to protect the most vulnerable children among us.
7. The church may host a panel or debate-style question and answer session. Enlist the testimonies of those in your own congregation to tell their stories of abortion, adoption, or choosing life and motherhood. Provide training so women and men can be available to pray with people and help in the healing process, whether to walk alongside a couple facing overwhelming challenges while pregnant or grieving and healing from the loss of a child or grandchild to abortion.
8. Finally, know the resources in your community. Pregnancy care centers, modern adoption agencies, housing, transportation, and other services available for single parents for things like auto repair and minor house repairs. Prepare your church to wrap the love of Jesus around a young mother who's pregnant. Let your congregation know that private sins are dealt with privately and every life is created by God and celebrated. No one is alone.

So are you up for the challenge?

Can you talk to other pastors? Can you talk to your congregation?

Or, are we alright with 2,000 children being tortured to death every month in Colorado and now born children being targeted to be castrated and their bodies mutilated?

Have we had enough yet? Enough where we will do something about it?

Part of a revival, part of an awakening, is that our faith informs our action. We don't just say we love others. We don't just say we are prolife. Our actions show our repentance.

When we love people, we care about the policies governing their lives.

Right now, we have a Sodom and Gomorrah in our state. And it's not just Denver and Boulder. It's your community. And it's mine. We are responsible for the laws in our state and the legislators who represent us. We are responsible for our school boards and city councils. We are responsible for the policies in our schools and the ordinances in our cities. We are responsible for the children dying while we are silent.

For fifty years, we have delegated our personal and corporate responsibilities to a few secular political groups. How's that been working for us? Are you ready for a change? Are you ready to be the change? Are you ready to lead the change from the pulpit? The change starts in the pulpit. Until then, nothing will change. But when it does, everything will change.
