

FOR MEDICAL PROVIDERS

Summary:

This initiative redefines legal personhood to include all children from conception. It prohibits elective abortions and abortion-inducing drugs while explicitly protecting life-saving medical interventions.

What It Does Not Do:

- It **does not criminalize miscarriage care** or treatment for ectopic pregnancy.
- It **does not penalize physicians** who act in good faith to preserve the life of the mother.
- It **does not interfere with neonatal or perinatal palliative care**.

What It Does:

- Requires triage and care that values both mother and child.
- Shuts down abortion clinics and illegal pharmaceutical abortion providers.
- Requires referral of expectant parents to life-affirming medical and social services.
- Promotes adoption over termination.

For Medical Ethics:

- Respects the Hippocratic Oath: “Do no harm.”
- Supports maternal-fetal medicine and perinatal hospice models.
- Shields ethical providers from unjust liability in emergencies.
